

Landslide Risk Reduction

**Grow more trees/
vegetation**

**Keep drains clean.
Don't change
natural drainage**

**Don't place debris,
waste material on
a steep slope.**

**Don't construct
near steep slopes
& drainage path**

**Tune to radio,
TV for updates
& alerts**

**Subsidence of building,
cracks on rocks, muddy
river water are warnings**

**Store emergency supplies
of food and water, flashlights,
batteries, and medicine ready**

**Keep a disaster kit with
essential identity
documents ready**

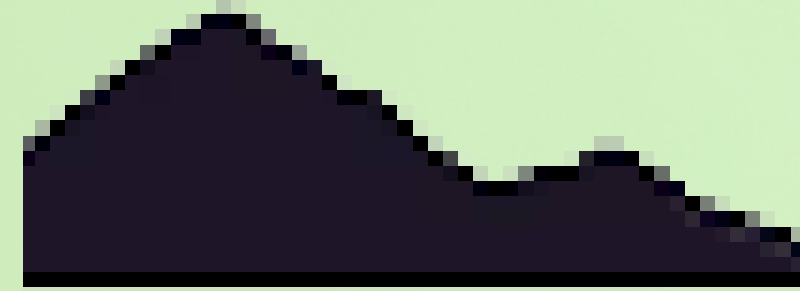

During & After Landslides

**Ignore rumours.
Stay calm.
Don't panic**

**Stay together
with your
companions**

**Avoid staying in
low-lying areas or
valleys**

**Inform nearest Govt,
Disaster Management
Helpline.**

**Don't drink unclean
water directly from
river springs, wells**

**Stay away from slide area
There may be a danger
of additional slides.**

**Check for injured or
trapped persons**

**Don't move an injured
person without rendering
first aid unless he/she is
in immediate danger**

**Don't touch/walk
over loose material
and electric wires or
poles**

**Stay away from the
location until experts
confirm that it is safe**
