SUMMARY

Agriculture, with its allied sectors, including livestock, is the largest source of livelihood in India. Around two-thirds of our population live in rural areas and India's large livestock population is central to the country's agriculture and its village economy. The rural population have a special bonding with animals which is always reflected during disasters. While the working animals play an important role in the livelihood of vulnerable communities, their needs are overlooked and unaddressed in disasters. It has been mentioned in the Flood Guidelines of NDMA that on average over 94,000 animals perish in floods alone every year.

While the Disaster Management Act, of 2005 is a very comprehensive Act, there is no mention of animals/ livestock nor of the Animal Husbandry Department anywhere in the Act although livestock is a valuable asset for the rural agriculture-based population. The Sendai Framework of DRR (2015-30), to which India is a signatory, also lays specific emphasis on commitment to strengthening & protection of livelihood and productive assets including livestock and working animals etc.

In the light of the above, it is imperative to initiate a well-chalked-out strategy to ensure that the issues relating to animals in disasters get appropriate attention and their rightful place in the disaster management framework in the country. With this aim the Policy Perspectives Foundation and Sphere India organised a national-level workshop under the aegis of the Ministry of Animal Husbandry (AHD), National Disaster Management Authority (NDMA) and Veterinary Council of India (VCI) at the India International Centre, New Delhi on the 22nd June 2022.

The workshop also featured the release of 'Multi-Stakeholders Coordination Handbook for Management of Animals in Disasters', at the national level, which is an initiative of Sphere India.

The handbook is envisaged to be an operational guide/ manual for coordination during emergencies. It includes guidance and advice on how different stakeholders and agencies can work together to prioritize Animal Management during disasters. This handbook covers guidelines for animal-centric technical interventions during emergencies which includes human-animal rescue, safe evacuation and transportation, emergency feed, water & veterinary support. It also covers national and international experiences. This handbook shall be used by the various agencies and central & state authorities working on Animal Protection across the country.

INAUGURAL SESSION

In the inaugural session of the workshop on Mainstreaming Animal Issues in DRR, the welcome address was presented by **Mr. P.C. Haldar**, President, PPF and the keynote address was presented by **Mr. K.M. Singh**, Vice President, PPF. Experts from the Animal Management and DRR sectors participated in the workshop. **Mr. Vikrant Mahajan**, CEO, of Sphere India, presented his views on **Multi-stakeholder Coordination**.

The chief guest for the occasion was **Shri. Atul Chaturvedi** (IAS), Secretary, Animal Husbandry & Dairying, Ministry of Fisheries, Animal Husbandry and Dairying (MoFAHD). He released the **'National Guidelines on Management of Animals in Disasters'**. The other distinguished members who graced the occasion included the likes of **Mr. Upamanyu Basu**, Joint Secretary Ministry of Animal Husbandry; **Mr. Kamal Kishore**, Member Secretary, NDMA; **Dr. Krishna S. Vatsa**, Member, NDMA; **Dr. Vinod Bhatt**, Secretary, Veterinary Council of India.

Mr. P C Haldar, *President*, *PPF*, in his welcome address, stated that a new phase of working has been started post-pandemic. The Centre for disaster reduction of the PPF is the chief force behind today's event. The National Plan released by the animal husbandry department was the first by any department and was acknowledged at the Mexico International Conference as being the first by any country. Now we are in the process of institutionalizing the process. We need much greater cooperation between the centre and state as well as multiple stakeholders.

Shri. K M Singh, *Vice president*, *PPF*, in his keynote address opinionated that along with the members from the NDMA, participation from state government representatives is also very important. India is an agrarian society and animals constitute a large part of their livelihoods as livestock. In the past few years, there had been a loss of animals during the disasters but the disaster management act lacks the focus on animals. There is a need to take some steps for the protection of animals. In 2005-06 post-Katrina, the United States of America amended their act and now the animal's needs had been acknowledged worldwide. SENDAI framework also recognized it. A lot of work had been done by the government, but still, coordination among various stakeholders is missing. In the year 2000, World Animal Protection (WAP), conducted an exercise to identify the gaps in the management of animals during emergencies and identified the gaps such as inadequate human resources, lack of training resources, absence of disaster management in the plans, and lack of farmers' involvement and knowledge institutions.

He mentioned the various decisions by the NDMA for improving the animal's cause in the country, it included the establishment of VERU, for skill development of students, para-vets etc and awareness generation. Currently, there are 6 VERU units in the country. The second decision of NDMA included the training of NDRF personnel. Till 2018, 300 trainers had been trained but it needs to be revived post corona; also need to focus on training of SDRF. The third decision was the development of one training module by NIDM on the same and the last decision was the effective management of animals during emergencies. He also spoke about Uttarakhand's high court judgement and concluded by saying that in today's conference AHD, NDMA and veterinary dept. are there along with six state representatives. He wishes for the success of this endeavour which will pave a new way for animal management during emergencies.

Shri. Atul Chaturvedi (IAS), Secretary, Animal Husbandry & Dairying, MoFAHD started his address by thanking his former teachers. He shared that earlier when he was the CEO of the State Disaster Management Authority (SDMA), Assam, he did a lot of work in the sector. He acknowledged the size and contribution of the sector to the growth of the nation. Since 2014 its contribution is constantly growing. He stated that the manufacturing sector grows at 4-4.5 % and the agriculture sector grows at 2 % but the DRR sector is growing at the rate of 8 %. The exports of buffalo and fish are roughly estimated to be INR. 70, 000 crores. This sector is known as the ATM for the farmers. The animal holding in the country is 2-5 animals per family. It is one of the areas that work for disaster mitigation for the farmers and helps them to sustain themselves during and after floods. He mentioned one study conducted by MANAGE (National Institute of Agricultural Extension Management), which stated that farmers who own livestock in addition to agriculture never commit suicide. We need to invest in disaster preparedness for this sector and disaster risk mitigation. Also, the animal diseases front is lagging behind and needs utmost attention. They are in the process of revising the first disaster risk reduction plan, 2016. Their department releases a lot of advisories on the sector. Another important aspect is the emergence and re-emergence of biological diseases and if the animals are not healthy then the humans also cannot stay healthy. For the wildlife and domesticated animals, we need preparedness on animal health because the food and nutrition come from there and it affects the health of the country and the economy. They are working with Bill and Melinda Gates Foundation (BMGF) and the World Bank (WB) on the framework and platform for animal health, human health and wildlife health. They are in the process of digitizing the whole canvas of animal management, including the population of the 5 species: cattle buffalo, pigs, goats and sheep and developing the National Digital Livestock Mission. The Animal Pandemic Preparedness initiative is still missing. India can take lead as we have the largest livestock population.

There is a need for Ecosystem-coordination in transboundary issues so that the diseases in animals do not spread rapidly. The last aspect shall be vaccine development and R&D on it. India can lead the path and become a world leader in it.

Mr. Vikrant Mahajan, CEO, Sphere India, mentioned the importance of livestock in the world and their protection during disasters. India had made a strategic lead, post Plan 2019 and mainstreamed animals across the country and its section 2.5 mentions livestock and wildlife. It shows the commitment of the government to animal welfare. We have inherent community strength and need to focus on them also. He mentioned the name of the organizations working with animals such as Donkey Sanctuary, Heifer International etc. There is a need to mobilize stakeholders. In future, there are plans to work in collaboration with NIDM, and build capacity. The resources from other organizations such as Amul, Mother dairy, etc can be mobilized.

Mr. Kamal Kishore, Member Secretary, National Disaster Management Authority (NDMA), mentioned the sector's contribution to the economy. He stated that the father of our nation, Gandhi ji, mentioned that society is valued by the way his animals are treated. His key point of discussion included that the key to success is a community-based approach, where animals are part of the household. We need to empower the families in their own ways. Improved early warning systems need to be in place so that each family knows what needs to be done during a disaster. The capacity of NDRF, SDRF and AAPDA Mitra needs to be built along with volunteers. We need to focus on the wild animals and build upon the existing knowledge.

TECHNICAL SESSION

RELEVANT INTERVENTIONS FOR ANIMAL CARE IN DRR

Dr Krishna S. Vatsa, *Member*, *National Disaster Management Authority*, chaired and moderated the session. He focused the discussion on 'Animal Care and Protection in Disaster Management'.

KEY DISCUSSION POINTS:

- During the Latur earthquake in 1993, 15,000 animals perished along with 8,000 human beings.
- People tie their animals next to the kitchen and it resulted in huge losses. It happened in the 2005 floods in Mumbai, large Tabela (stable) industry was lost.
- The Yadav community was running the industry and they faced economic as well as emotional loss.
- Our care and support for the animals improve the local economy and well-being. Large-scale floods lead to large-scale animal losses.
- He mentioned that we have serious policy anomalies and it is leading to such huge losses.
- We do not have preparedness for floods, it needs to be corrected in terms of rescue, raised platforms and volunteer training.
- Animal rescue is a specialized function, and there is a requirement for response, recovery and mitigation support.

Dr. P Kumaravel, Dean, Veterinary College & Research Institute, Tamil Nadu & VERU South Zone Coordinator, spoke on 'Strengthening Institutional Mechanisms & Veterinary Emergency Response Units (VERU) for protecting animals in emergencies'. He mentioned that the concept of one health including animals and humans is very crucial and VERUs play an important role in this.

KEY DISCUSSION POINTS:

- VERUs play important role in attending to the animals. It is focused on training the students
 of disaster management and veterinarians.
- He shared the experience of TANUVAS, where the coordinators go to the field and conduct rescue missions. They have a BLOCK course, skill-based training and simulation exercises for the students. They conduct capacity-building programs for NDRF, and teaching faculty.
- In the case of hydrological disasters and fire accidents, special guidance and training are required for handling the animals.
- They also develop Standard SOP for state disaster plans. His VERUs played a unique role during the Chennai floods. They also work on the empowerment of first responders (rural youth training), and multi-purpose evacuation shelters (MPES).
- The women in the household are responsible for taking care of the animals such as feeding, bathing, milking, and for marketing of produce, therefore women empowerment is required for animal empowerment.

Dr. Pankaj Kumar, Head Dept. of AH Extn & O/C VERU, Bihar Veterinary College, spoke on the **Capacity Building of Veterinarians in Management of Animals in Emergencies**. He mentioned the genesis of the protection of animals during disasters, especially in north Indian states.

KEY DISCUSSION POINTS:

- In the year 2009 after the KOSI floods, Bihar college established the first VERU in collaboration with WAP.
- They started training for capacity building for multiple stakeholders across the country. Post-disaster intervention is very important for marginalized rural communities. The VERU was the perception of the state of Bihar.
- The VERU objectives include training students, livestock owners, and Animal Husbandry Department (AHD) officers.
- He mentioned the VERU training modules for students which included 14 sessions. He also mentioned the training modules for the Animal Husbandry Department officers. It comprises a 4-day training module including 17 modules.

Shri Manoj Yadav, *DIG Training*, *NDRF* presented on *Capacity Building of Responders for Swift Rescue of Animals in Disasters*. He stated that NDRF is about operations on the ground and discussed the challenges faced during such operations;

KEY DISCUSSION POINTS:

- He shared his real-time experiences during the Kashmir floods where there were huge losses.
- He also mentioned the physical, social and economic impacts. He also talked about the postdisaster effects in terms of carcasses disposal and health-related issues.
- 198 million livestock are prone to floods annually and a similar number is affected by droughts. He discussed the role of NDRF during disasters, rescue operations, and evacuation.
- The rescuers are trained professionally for 19 weeks of training across the country. Familiar Exercise (FEMEX) is for the awareness of the community and school children.
- Till now 67 lakhs people and 11 lakhs children had been sensitized.
- He also shared the challenges faced before, during and after the disasters. It included identification of safe location, stocking and recovery routes.

PRESENTATIONS: KERALA, RAJASTHAN AND ASSAM

Dr. Sekhar L. Kuriakose, *Member Secretary*, *Kerala State Disaster Management Authority*, discussed the role of NGO involvement, challenges in the inclusion of change theory in risk reduction planning and creating a network of trained cadre. He shared many local-level initiatives during the course of his presentation which includes the involvement of PRIs, management of snakes, etc.

Dr. Anand Sejra, *Additional Director*, *Department of Animal Husbandry*, *Govt. of Rajasthan* shared the action plan of the state government during droughts. He said that their state has the second-largest livestock population in India including 1.39 crores of cattle, 1.36 crores of buffaloes, 17 lakhs sheep, 2.08 crores of goats and 2.13 lakhs camels. They make arrangements for fodder depots and cattle camps and also organize mass vaccination of the animals on regular basis.

Mr. Poorva, *Secretary, DAHD, Govt. of Assam* shared about the Issues & Challenges, possible solutions and way forwards to Animal inclusive Disaster Management with respect to the state of Assam. The key highlights of their AiDRR plan included boat clinics, mobile veterinary units, livestock insurance and low-cost shelters.

VALEDICTORY SESSION

Dr. Monika Gupta, *Senior. Veterinary Officer, Govt. of UP*, led the discussion on animal management during emergencies. She informed that:

- VERU is a great initiative and shared one of her experiences from north-eastern regions where
 people refused to leave their houses without their poultry animals. She thanked NDRF for
 cooperating with them.
- There is a need for a multi-disciplinary inter-sectoral approach to handling animals during disasters. Disaster management is a state subject and so is animal management.
- The scheme called "Pashu-Mitra" was very good and it can be combined with "Aapda Mitra" and can be renamed "Pashu-aapda Mitra".
- Discussion on transboundary diseases and transboundary zoonotic diseases is missing during state coordination.
- We need to work with the Ministry of Environment as it is the nodal ministry for wildlife. We
 need to focus on sharing and highlighting the success stories for animal protection and rescue.
- Traditional knowledge about animals is very important and is currently missing from the universities also. It will add to the technological knowledge.
- We can coordinate with NIDM for skill-based knowledge sharing.

Dr. Vinod Bhatt, *Secretary*, *Veterinary Council* of India gave the special address. He stated that we are now in the recovery phase of CORONA which had pushed us to the corners. It questioned our preparedness for disasters.

- He mentioned that many times we are helpless because we were not prepared for the preparedness.
- The veterinary council of India is enacted by the parliament and it monitors veterinary education in the country.
- It is the right time to make some guidelines in the graduate level syllabus for students to prepare for the challenges.
- The ground reality is very different and we need to plan our education guidelines on the same.
- There is a need for rapid maintenance of the preparedness plans in a professional manner.

Mr. Upamanyu Basu, *Joint Secretary*, *Ministry of AHD*, addressed the valedictory session by summarizing the proceedings of the workshop. He highlighted that when there is a call for action all you need is your heart to respond to any emergency situation.

- He recommended that the VERU course should be part of the second-year university program.
 There is a lack of coordinated efforts on the ground.
- He is heading the largest vaccination program for animals for the normal as well as zoonotic diseases (that can be transferred from humans to animals).
- We need to have more capacity building, though it is in very limited states but it is required nationwide including wild animals.
- Wild animals have inbuilt disease resistance in themselves.
- We need political support, bureaucratic support and people's commitment to recovery and disaster preparedness.

 The animal vaccination continued even during the pandemic. Strengthening the legal frameworks is very much required.

The vote of thanks was presented **by Mr. KM Singh**, *Vice President, PPF*, and expressed his gratitude to all the speakers and participants who had joined in person and virtually.

KEY RECOMMENDATIONS

- There is a need for a broad policy framework and community-based approach for animal care and protection, state-level interventions, setup of community-level infrastructure for animals and develop technical capacities for animal care.
- To promote capacity building and training for the empowerment of first responders (rural youth training), community representatives, PRI's and setting up of multi-purpose evacuation shelters (MPES).
- There is a requirement for wildlife protection training. Training needs to be customized as per region specifics based on the ago-climatic conditions.
- An awareness program is one of the key solutions to animal-inclusive disaster risk management.
- Quick-release of compensation to affected livestock owners under SDRF norms.
- Provisions by the state Animal Husbandry Department for the development of low-cost livestock shelters.
- Post Disaster Needs Assessment (PDNA) for animal loss should also be conducted with the PDNA's for other sectors. There should be a Rescue and Recovery team in this sector.
- The number of Veterinary Emergency Response Units (VERU) should be established across all the veterinary universities and colleges across the country. In the existing colleges, it needs to start at the second-year university program.
- For disaster preparedness, response and rescue of the animals during emergencies, there is a requirement for multi-sectoral coordination between the Animal Husbandry Department at the centre and states, SDMAs, Veterinary Institutes and NDRF.

ANNEXURES

AGENDA OF THE WORKSHOP:

| Welcome Address | Shri PC Haldar, President, PPF | |
|---|--|--|
| Key Note Address | Shri KM Singh, Vice President, PPF | |
| Multi-stakeholder Coordination | Shri Vikrant Mahajan, CEO, Sphere India | |
| Address by the Guest of Honour | Shri Kamal Kishore, Member, NDMA | |
| Address by the Chief Guest, Release of 'National Guidelines on Management of Animals in Disasters': by Sphere India | Shri Atul Chaturvedi, Secretary, MoFAHD | |
| Vote of Thanks | Sphere India | |
| 11.20-13.20: Main S | ession | |
| Relevant Interventions for Animal Care in DRR | Dr. Krishna Vatsa, Member, NDMA | |
| Strengthening Institutional Mechanisms & Veterinary Emergency Response Units (VERU) | Dr. P Kumaravel, Dean, Veterinary College & Research Institute, Tamil Nādu | |
| Capacity Building of Veterinarians in Mgt. of Animals in Emergencies | Dr. Pankaj Kumar, Head Dept of AH Extn & O/C VERU, Bihar Vet College | |
| Capacity Building of Responders for Rescue of Animals in Disasters | Shri Manoj Yadav, DIG Training, NDRF | |
| Presentation: Kerala | Shri Shekhar L. Kuriakosa, Kerala State Disaster Management Authority | |
| 13.20-14.00: Valedictory Session: | | |
| Discussion Special Address | Dr. Monika Gupta, Sr. Veterinary Officer, Govt. of UP Dr. Umesh Sharma President, Veterinary | |
| Valedictory Address | Council of India | |
